Blended Learning For All Schools In Makati

In today's rapidly evolving world and due to unfortunate times, the field of education was introduced to the implementation of blended learning in the school systems, with it standing as a solution and blending the best parts of traditional and digital means of education to create a dynamic and personalized learning experience.

Blended learning provides multiple benefits for highschool students with the amount of schoolwork that needs to be done, for example, they will be able to do their work at their own pace and time which develops their time management skills to finish their task on time; furthermore, Online learning can also help students that may have a hard time socializing in big public schools, additionally students will have fewer expenses with commuting and handling food

This is further supported by University of the Philippines Cebu TLRC, with blended learning providing benefits like money saving, easy access resources, and immediate feedback through quizzes being instantly checked with auto checkers with this they will be able to monitor or even trace their grades.

However, blended learning doesn't allow students that may not be able to afford gadgets making it seem to be gatekeeping or not a viable option for these type of students or families; additionally, working in a non-school environment promotes procrastination with the students not minding the given tasks immediately or getting distracted easily in the environment they are working in.

To conclude, Blended learning can only really serve as a band-aid or temporary solution to the education system in the Philippines or Makati, with it needing further development and research to really be a viable solution for the High School students of Makati.
